Office Action Summary

Application No.

10/613,796

Applicant(s)

VANNEY, GUY

Examiner

Christopher D. Koharski

Art Unit

3763

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 08 June 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 21-37 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☐ Claim(s) 21-30, 32-34, 36 and 37 is/are rejected.
- 7) ☒ Claim(s) 31 and 35 is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on _____ is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Information Disclosure Statement

The information disclosure statements (IDS) submitted on 01/30/2004 and 02/03/2004 are in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 21, 23-30, 32, 33, 36, 37 are rejected under 35 U.S.C. 102(b) as being anticipated by Burns et al (3,773,034). Burns et al discloses a catheter to be used in a blood vessel (col 1, ln 10-15) with a catheter body and multiple lumens (73-75) offset from said catheter body. The disclosed catheter describes a method for steering the catheter body by using fluid force and pressure of syringes (96) coupled to the sealed lumens to create bending angles on the catheter (col 3) and an active distal region (14). Different flow rates and pressures can be created and adjusted by the user (col 2, ln 15-20 and 43-53) to create different moments between two different lumens. Pluralities of steering lumens (73-75) are shown in figure 6 that are used to apply different bending forces along the catheter body.

Art Unit: 3763

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 22 is rejected under 35 U.S.C. 103(a) as being unpatentable over Burns et al in view of Jacobs (6,074,361).

Burns et al discloses the claimed invention except for the pre-curved distal catheter portion. Jacobs teaches that it is known to use a pre-determined distal end shape (2a) to provide the catheter with a pre-bent structure that will be easier to deform once in the correct anatomical location within the patient. It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the catheter as taught by Burns et al with a defined distal catheter body shape as taught by Jacobs, since such a modification would provide the catheter with a curved distal segment for providing ease of use upon first insertion into the patient and yet easily deformable once the catheter has reached its determined location for treatment, diagnosis, or examination.

Claim 34 is rejected under 35 U.S.C. 103(a) as being unpatentable over Burns et al in view of Lia (4,794,912). Burns discloses the claimed invention except for the four distinct actuating lumens. Lia teaches that it is known to use four distinct lumens (30) to provide omni-directional fluid controlled movement. It would have been obvious to one having ordinary skill in the art at the time the

Art Unit: 3763

invention was made to modify the catheter system as taught by Burns et al, with additional lumens as taught by Lia, since such a modification would provide the catheter with more lumens for providing increased movement and degrees of freedom with catheter steering.

Allowable Subject Matter

Claims 31 and 35 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hake, Danna et al, Thompson, Del Guercio.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher D. Koharski whose telephone number is 571-272-7230. The examiner can normally be reached on Monday through Friday 7:30am-4:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nicholas Lucchesi can be reached on 571-272-4977. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
